

JUSTICE & EXPERIMENTS IN LIVING

a philosophy talk by **GREGORY ROBSON** (Univ. of Arizona)

MONDAY - 2/18/19 - 4PM - PETIGRU 111 - USC

Might political and legal experiments in living yield insights into the demands of justice? After proposing a conception of experiments in living, Robson shows how a more experimental, a posteriori approach to understanding justice than is common in the literature can yield valuable insights about justice. He also considers the rationality of conducting experiments in living.
